

JAMO S408 HCS1

With 540 watt of total music power, the S408 HCS1 package offers excellent value for money but without compromises in design or sound. Give these speakers a listen and compare them to our competitors' products... we promise you will be surprised! Equipped with rear-firing bass-reflex ports and dual 6.5" woofers the S408 floorstanders deliver a punch worth of any high-octane, tub-thumping Hollywood action film. The centre and satellite speakers come with supplied wall mounts, of course, allowing terrific versatility when it comes to placement options. In closing, we should also mention that all the models in the S 40 series have removable front fabric grilles. You have the choice of leaving them on or off, but, just as importantly, it also shows that we have nothing to hide with these beauties... quite the opposite!
